01

PERSONAL PROFILE

I am Bowornthat Kerdsong (Kao), born on 6 July 2002 and raised in Laplae District, Uttaradit Province. I am a sixth-year medical student at the Faculty of Medicine Siriraj Hospital, Mahidol University.

I grew up in a provincial family and live with my father and two elder brothers. My family taught me humility, self-confidence and a clear sense of duty. Growing up outside Bangkok showed me the barriers many patients face in reaching care, and taught me to see each patient as a person rather than a case.

I am a self-directed learner who advances fastest under strong mentorship. I seek opportunities beyond my stage of training, acknowledge error early and move forward, and learn from colleagues at every level. My subspecialty choice remains open between cardio-vascular-thoracic and hepato-pancreato-biliary surgery, and I intend to settle it through sustained clinical exposure during the service period.

My long-term aim is an academic career in surgery — teaching, research, and bringing training from leading centres back to strengthen surgical capability in Thailand.

Fig. 1.1 Portrait

Fig. 1.2 Portrait

SPECIALTY INTEREST

UNDER CONSIDERATION

1 · Cardio-Vascular-Thoracic Surgery (CVT)

physics- and logic-driven practice; aortic and endovascular surgery; clear, rapid outcomes

2 · Hepato-Pancreato-Biliary Surgery (HPB)

an anatomy that has held my interest since preclinical years; my first self-conceived research question; role models among the HPB faculty at Siriraj and Thammasat

ALSO OPEN TO Trauma surgery and other general surgery subspecialties

EDUCATION

2021–present	**Doctor of Medicine (M.D.)**, Faculty of Medicine Siriraj Hospital, Mahidol University Sixth-year medical student · GPA 3.66 · expected graduation 2027
2015–2020	Uttaradit School, Uttaradit Province

CONTACT

(+66) 91-031-9522

02

RATIONALE AND TRAINING PLAN

RATIONALE FOR SURGERY

Surgery offers a **directness between intervention and outcome** that I have not found in other medical specialties. On my fifth-year general surgery elective at Buddhachinaraj Hospital, I volunteered for additional on-call duty and managed a nineteen-year-old man with acute appendicitis — from emergency assessment, through operation as leading surgeon under general surgery resident supervision, to discharge. Carrying one patient across that entire arc confirmed the specialty for me.

Fig. 2.1 With the general surgery resident who invited me to the case and assisted at my first open appendectomy as leading surgeon, Buddhachinaraj Hospital

RATIONALE FOR APPLICATION TO THAMMASAT

Institutional familiarity. Across four electives at Thammasat — cardio-vascular-thoracic and hepato-pancreato-biliary surgery in my fifth year, then a second hepato-pancreato-biliary rotation and trauma surgery (in progress) in my sixth, eight weeks in total — and the One-Day Journey in Cardiothoracic Surgery 2026, my understanding of its case mix, workflow and teaching culture **rests on direct experience rather than reputation**.

Breadth at the point of decision. An academic surgical career commits a surgeon to one subspecialty for twenty to thirty years. **Both units under my consideration operate here**, alongside the wider department, so that decision can rest on months of hands-on clinical work rather than a brief elective.

Teaching from the outset. As a medical school, Thammasat allows me to **begin teaching medical students during the service period** — experience a non-teaching hospital cannot provide.

Choice of programme. I have deliberately chosen the standard service route over pathways to earlier board eligibility. My objective is **subspecialty training at a leading international centre, followed by a return to academic practice in Thailand**; that requires operative competence and a research record able to withstand competitive selection. The additional time is an investment, not a delay.

Fig. 2.2 With the cardiothoracic surgery team, Thammasat University Hospital (elective, 2026)

POST-SERVICE TRAINING PLAN

During the service period. Broad operative and procedural exposure across the department, teaching of medical students, and an active research programme: the Grade II acute cholecystitis study continues through its online database, alongside a prospective study of my own design. **Subspecialty commitment: second or third year of service.**

Residency. The route follows the decision — **direct five-year training in thoracic surgery**, or four years of general surgery followed by a two-year HPB fellowship. Training institutions will be judged on research opportunity, case volume, operative technology, and a culture of graduated operative responsibility.

Thereafter. Subspecialty training abroad, then a return to academic practice — **translating that training into institutional capability rather than individual expertise**.

03

PROFESSIONAL ATTRIBUTES

1 **Growth-oriented, self-directed learner.** On the Thammasat HPB unit, progressed by personal request from a fifth-year journal club to a sixth-year topic presentation on bile duct injury; presented at the Siriraj CVT grand round (blunt thoracic aortic injury); requested additional calls, including overnight ICU duty.

Fig. 3.1 Journal club presentation, Hepato-Pancreato-Biliary Surgery and Transplantation, Thammasat University Hospital (fifth-year elective)

Fig. 3.2 Topic presentation on bile duct injury, Thammasat University Hospital, 29 October 2026

Fig. 3.3 Topic presentation on bile duct injury, Thammasat University Hospital, 29 October 2026

2 **Original problem-framing.** Conceived the Grade II acute cholecystitis study and brought it to Siriraj HPB faculty, who shaped its scope; designed a visual sticker system to reduce loss to follow-up in chronic kidney disease.

Evidence: ongoing research and presentation on the sticker system (Academic work).

3 **Listening before acting.** Learns from colleagues at every level, juniors included; resolved a long-standing court-allocation dispute by identifying each party's underlying need.

Fig. 3.4 Siriraj Basketball Club with the Dean of the Faculty of Medicine Siriraj Hospital (former president; current club advisor)

4 **Composure after setback.** Acknowledges error early and moves forward; sustained by six years of strength training and current training in mixed martial arts, Muay Thai and Brazilian jiu-jitsu.

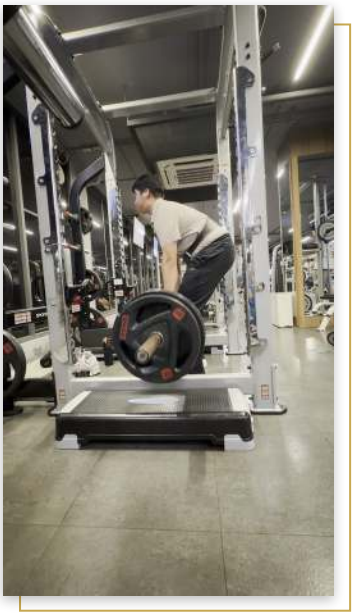

Fig. 3.5 Strength training (deadlift)

Fig. 3.6 Brazilian jiu-jitsu training

5 **Teaching as vocation.** Prefers bedside teaching on the ward; directed an ultrasound workshop for medical students; mentors rural secondary-school students.

Fig. 3.7 Teaching at a basic echocardiography workshop

Fig. 3.8 Teaching at a basic echocardiography workshop

Fig. 3.9 Guidance on medical school admission for secondary-school students

04

ACADEMIC WORK

ONGOING RESEARCH

Outcomes of Surgical Management for Acute Cholecystitis (Grade II): A Comparative Analysis of Surgical Timing, Percutaneous Cholecystostomy Drainage, and Surgeon Expertise at Siriraj Hospital

Principal student investigator, under Principal Investigator Asst. Prof. Pholasith Sangserestid, M.D., with Co-Investigators Prof. Yongyut Sirivatanauksorn, M.D., and Charnwit Assawasirisin, M.D., Division of Hepato-Pancreato-Biliary Surgery, Faculty of Medicine Siriraj Hospital. **I conceived the study question and proposed it to the HPB faculty, who refined its scope and design.**

Retrospective chart review; project number 434/2569 (IRB4). The protocol was structured for continued data capture through an online database and records a parameter set sufficient to support several derivative studies.

Fig. 4.1 With Prof. Yongyut Sirivatanauksorn, M.D., hepato-pancreato-biliary surgeon, co-investigator on my acute cholecystitis research and Director of Siriraj Hospital until 30 September 2026, who wrote my first letter of recommendation — sixth-year extern ceremony, 21 April 2026

JOURNAL CLUBS AND GRAND ROUND

Fifth year	Journal club presentation, Hepato-Pancreato-Biliary Surgery and Transplantation unit, Thammasat University Hospital (elective)
Sixth year	Topic presentation, same unit: bile duct injury after cholecystectomy (29 October 2026)
Siriraj	Journal club presentation at the cardiothoracic surgery grand round, Faculty of Medicine Siriraj Hospital: blunt thoracic aortic injury (3 September 2026)

PRESENTATIONS

2026	Bile duct injury after cholecystectomy: from recognition to reconstruction. Topic presentation, Hepato-Pancreato-Biliary Surgery and Transplantation, Department of Surgery, Faculty of Medicine, Thammasat University, 29 October 2026
2026	Quality improvement: a visual sticker system to reduce loss to follow-up in chronic kidney disease. Oral presentation, Siriraj Community Medicine Conference, Dan Chang Hospital, Suphan Buri
2026	Renal protection: avoidance of unprescribed compounded medication to limit progression of chronic kidney disease. Oral presentation, Siriraj Community Medicine Conference, Dan Chang Hospital, Suphan Buri
2024	Surgical management of colorectal cancer in Lynch syndrome: extended versus segmental resection. Oral and poster presentation, Siriraj Research Day
2019	A generalised mathematical model for estimating the perimeter of regular n-gons. Oral presentation (English), International Conference for Students in Science and Innovation; poster presentation (Thai), Development and Promotion of Science and Technology Talents Project

WORKSHOPS AND CONFERENCES

2026	TEVAR Foundation workshop, Faculty of Medicine Siriraj Hospital, Mahidol University, 7–8 September 2026 — attended by invitation
2026	One-Day Journey in Cardiothoracic Surgery 2026, Faculty of Medicine, Thammasat University, 8 August 2026

05

THAMMASAT ELECTIVES

Four electives · cardiothoracic surgery and hepato-pancreato-biliary surgery (fifth year, March–May 2026); a second hepato-pancreato-biliary rotation and trauma and critical care (sixth year, October–November 2026) · eight weeks in total

ELECTIVE RECORD AT THAMMASAT UNIVERSITY

2026	Trauma and Critical Care, Department of Surgery, Faculty of Medicine, Thammasat University, Thammasat University Hospital (1–14 November 2026; in progress)
2026	Hepato-Pancreato-Biliary Surgery and Transplantation, Department of Surgery, Faculty of Medicine, Thammasat University, Thammasat University Hospital (19–30 October 2026, 2 weeks)
2026	Cardiothoracic Surgery, Department of Surgery, Faculty of Medicine, Thammasat University, Thammasat University Hospital (2 weeks)
2026	Hepato-Pancreato-Biliary Surgery and Transplantation, Department of Surgery, Faculty of Medicine, Thammasat University, Thammasat University Hospital (2 weeks)
2026	One-Day Journey in Cardiothoracic Surgery 2026, Faculty of Medicine, Thammasat University, 8 August 2026

CARDIOTHORACIC SURGERY

Fig. 5.8 With the Hepato-Pancreato-Biliary Surgery and Transplantation team

HEPATO-PANCREATO-BILIARY SURGERY AND TRANSPLANTATION — SECOND ELECTIVE (19–30 OCTOBER 2026)

Hepato-Pancreato-Biliary Surgery and Transplantation, Thammasat University Hospital · 19–30 October 2026

Outpatient clinic, 27 October: one-to-one session with Assoc. Prof. Chatchai Mingmalairak, M.D., discussing the management of every case. For a patient with concurrent breast and colon cancer, I raised whether a hereditary cancer syndrome should be considered, and whether genetic testing could inform surveillance for first-degree relatives.

TOPIC PRESENTATION, 29 OCTOBER 2026

Topic presentation, 29 October: 'Bile duct injury after cholecystectomy: from recognition to reconstruction' — requested in person from Assoc. Prof. Assanee Tongyoo, M.D., and Aekkaphod Liwatthanakun, M.D., and attended by Asst. Prof. Palin Limpavittayaporn, M.D., Aekkaphod Liwatthanakun, M.D., and Ekkapak Sriussadaporn, M.D. The topic builds directly on my own research in acute cholecystitis.

ONE-DAY JOURNEY IN CARDIOTHORACIC SURGERY 2026

Faculty of Medicine, Thammasat University · 8 August 2026

Morning lectures were followed by afternoon skills stations, including a TEVAR simulation station supervised by Jongruk Kaewbunjong, M.D., who taught me stent-graft deployment on the actual device. First among medical students (sixth overall in an open multidisciplinary field) in the knowledge quiz; the only participant from Siriraj.

AORTIC AND ENDOVASCULAR INTEREST

TEVAR Foundation · Faculty of Medicine Siriraj Hospital, Mahidol University · 7–8 September 2026. A two-day workshop on the planning, sizing and technique of thoracic endovascular aortic repair, held with Medtronic and attended by cardiothoracic surgeons from partner institutions across ASEAN, with three live TEVAR cases on the second day. I took part as a sixth-year extern on the cardiothoracic rotation, at the invitation of Angsu Chartrungsan, M.D., following my journal club on blunt thoracic aortic injury at the cardiothoracic grand round. Faculty included Assoc. Prof. Worawong Slisatkorn, M.D.

OTHER CLINICAL ELECTIVES

ELECTIVES AND ROTATIONS

Fig. 6.1 Cardiology elective, Faculty of Medicine, Chiang Mai University

2026	General Surgery, Medical Education Center, Buddhachinaraj Phitsanulok Hospital (2 weeks)
2025	Hepato-Pancreato-Biliary Surgery, Department of Surgery, Faculty of Medicine Siriraj Hospital, Mahidol University (3 weeks)
2025	Colorectal Surgery, Department of Surgery, Faculty of Medicine Siriraj Hospital, Mahidol University (3 weeks)
2025	Cardiology, Department of Internal Medicine, Faculty of Medicine, Chiang Mai University (2 weeks)
2025	Internal Medicine, Medical Education Center, Buddhachinaraj Phitsanulok Hospital (2 weeks)

Fig. 6.2 Internal medicine elective, Buddhachinaraj Phitsanulok Hospital

07

LEADERSHIP AND TEACHING

2025–2026 **Vice President, Siriraj Surgical Society**

Project director, "Ultrasound in Surgical Emergency" workshop — developing point-of-care ultrasound competency among medical students

Co-organiser, "Essential of Burn Management & Military Medicine" workshop, in collaboration with Phramongkutklao College of Medicine

2024 **President, Siriraj Basketball Club (currently club advisor)**

Captained and managed the squad through three consecutive national championships

Directed the inter-medical-school tournament and more than five cross-institutional fixtures, establishing professional networks across faculties

Resolved a decades-old dispute over court allocation between hospital staff, alumni and students by constituting user groups, appointing a representative for each, and instituting a transparent allocation schedule — a system that remains in operation

Restructured club fundraising around an online merchandise channel, increasing profit by 200 per cent year on year

2023 **Student Committee, Faculty of Medicine Siriraj Hospital**

President of the male dormitory; third-year class committee member — student welfare advocacy and residential administration

Organising chairperson, SI 132 intramural sports — event planning and budget allocation

2023 Lead actor, Siriraj Family Concert 2023, the faculty's signature stage production

Fig. 7.1 Co-organiser, "Essential of Burn Management & Military Medicine" workshop

Fig. 7.2 Lead actor, Siriraj Family Concert 2023

MENTORS AND MENTORING FAMILY

Fig. 7.3 With Prof. Apichat Asavamongkolkul, M.D., Dean of the Faculty of Medicine Siriraj Hospital until 30 September 2026 and adviser to my mentoring family

09

COMMUNITY SERVICE

2026	Guest speaker and mentor, Banharn Jamsai Wittaya 3 School, Dan Chang — counselling rural secondary students on medical school admission and academic pathways
2023	Station facilitator, official medical freshman orientation programme; group leader and mentor, pre-medical outreach camp for secondary students
2022	Head of the Reception Department, Faculty of Medicine Siriraj Hospital — directed reception for the royally sponsored cremation ceremony for body donors, coordinating proceedings with due dignity for the bereaved families

Fig. 9.1 Head of the Reception Department, royally sponsored cremation ceremony for body donors

Fig. 9.2 Group mentor, medical freshman orientation

Fig. 9.3 Guidance on medical school admission for secondary-school students

10

BEYOND MEDICINE

Currently training in mixed martial arts, Muay Thai and Brazilian jiu-jitsu.

ATHLETICS

- Basketball since age 12, position Center
- Team Captain, Faculty of Medicine Siriraj Hospital, 2024
- Three consecutive national championships, National Medical Students Sports Competition, 2022–2024; captained the third
- Six years of continuous strength training, full-body hypertrophy · Deadlift 1RM 200 kg · Squat 1RM 140 kg
- Sustained throughout the most demanding call schedules; my principal means of managing occupational stress

NON-MEDICAL INTERESTS

- Basketball, strength training, running and swimming
- Professional-development podcasts
- Domestic travel
