PERSONAL

Date of birth: 6 July 2002

Domicile: 322/4 Moo 2, Phai Lom,
Laplae District, Uttaradit

Nationality: Thai

Religion: Buddhist

Blood group: O

Height / Weight: 190 cm / 104 kg

FAMILY

Resides with my father and two elder
brothers

NON-MEDICAL INTERESTS

Basketball, strength training, running and
swimming

Professional-development podcasts

Applied artificial intelligence in clinical
and research settings

Domestic travel

ATHLETICS

Basketball since age 12, position Center
Team Captain, Faculty of Medicine Siriraj
Hospital, 2024

Three consecutive national
championships, National Medical
Students Sports Competition, 2022–
2024; captained the third

Six years of continuous strength training,
full-body hypertrophy · Deadlift 1RM
200 kg · Squat 1RM 140 kg

Sustained throughout the most
demanding call schedules; my principal
means of managing occupational stress

Bowornthat Kerdsong / บวรทัต เกิดสง

CURRICULUM VITAE

Final-year medical student at Siriraj Hospital working toward an academic career in surgery. My primary training interest is cardio-vascular-thoracic surgery; despite my research experience which lies in general surgery, principally hepato-pancreato-biliary disease. I intend to resolve that divergence through sustained operative and clinical exposure during my service years, with other surgical subspecialties also under consideration.

SPECIALTY INTEREST

Primary Cardio-Vascular-Thoracic Surgery (CVT)

Research base General Surgery — hepato-pancreato-biliary (HPB) disease

Under consideration Trauma surgery and other general surgery subspecialties

EDUCATION

2021–present Doctor of Medicine (M.D.), Faculty of Medicine Siriraj Hospital,
Mahidol University
Sixth-year medical student · GPA 3.66 · expected graduation
2027

2015–2020 Uttaradit School, Uttaradit Province

RATIONALE FOR SURGERY

Surgery offers a directness between intervention and outcome that I haven't found in other medical specialties. During my 5th year, general surgery elective at Buddhachinaraj Hospital I volunteered for additional on-call duty and managed a nineteen-year-old man presenting with acute appendicitis — from initial assessment in the emergency department, through operative management as leading surgeon under general surgery resident supervision, to discharge. Carrying a single patient across that entire arc confirmed the specialty for me.

PROCEDURAL COMPETENCIES

- Core procedures to general-practitioner standard— thoracentesis, paracentesis, lumbar puncture, intercostal drainage, excision, debridement, incision and drainage
- Central venous catheterisation under supervision (Ultrasound guide, Seldinger technique)
- Open appendectomy as leading surgeon under supervision, first performed in late fifth year prior to externship
- Ambidextrous suturing and knot tying — one- and two-handed square knots, sliding and surgical knots, with attention to knot security
- Research data management and applied artificial intelligence in clinical and academic workflows

RATIONALE FOR APPLICATION TO THAMMASAT

Institutional familiarity. I have completed two electives at Thammasat — cardio-vascular-thoracic surgery and hepato-pancreato-biliary surgery during March – May of 2026, four weeks in total. My understanding of its case mix, departmental workflow and teaching culture therefore rests on direct experience rather than reputation.

Breadth at the point of decision. An academic surgical career commits a physician to a single subspecialty for the following twenty to thirty years. Both units under my consideration operate here, alongside the wider department, allowing that decision to rest on sustained clinical responsibility rather than brief exposure.

Teaching from the outset. As a medical school, Thammasat allows me to begin teaching and mentoring students during the service period — experience that cannot be accrued at a non-teaching institution.

Choice of programme. I have deliberately selected the standard surgical service-physician route over pathways offering earlier board eligibility. My longer-term objective is subspecialty training at a leading international surgical centre, followed by a return to academic practice in Thailand. That trajectory requires both operative competence and a research record capable of withstanding competitive selection for further clinical fellowship; the additional time is a deliberate investment rather than a delay.

POST-SERVICE TRAINING PLAN

During the service period. Broad operative and procedural exposure across the department; teaching and mentorship of medical students; and continuation of an active research programme. The Grade II acute cholecystitis study was designed for continued data capture through an online database and will proceed beyond graduation, alongside one prospective study of my own design. I have set the second or third year of service as the point of subspecialty commitment.

Residency. The route follows from that decision. Cardio-Vascular-Thoracic surgery permits direct entry to a continuous five-year residency; hepato-pancreato-biliary surgery requires four years of general surgery followed by a two-year clinical fellowship. Declaring a route in advance of the decision would be premature.

Institutional selection will rest on research opportunity, case volume and diversity, available operative technology, and a teaching culture that grants trainees graduated operative responsibility under supervision. Experience accrued during the service period will be the decisive input.

Thereafter. Subspecialty training abroad, followed by a return to academic practice — with the objective of translating that training into institutional capability rather than individual expertise.

ONGOING RESEARCH

Outcomes of Surgical Management for Acute Cholecystitis (Grade II): A Comparative Analysis of Surgical Timing, Percutaneous Cholecystostomy Drainage, and Surgeon Expertise at Siriraj Hospital

Principal student investigator, under Principal Investigator Assist. Prof. Pholasith Sangserestid, M.D., with Co-Investigator Charnwit Assawasirisin, M.D., Division of Hepato-Pancreato-Biliary Surgery, Faculty of Medicine Siriraj Hospital.

Retrospective chart review; project number 434/2569 (IRB4). The protocol was structured for continued data capture through an online database and records a parameter set sufficient to support several derivative studies.

PRESENTATIONS

- 2026** Quality improvement: a visual sticker system to reduce loss to follow-up in chronic kidney disease. Oral presentation, Siriraj Community Medicine Conference, Dan Chang Hospital, Suphan Buri

- 2026** Renal protection: avoidance of unprescribed compounded medication to limit progression of chronic kidney disease. Oral presentation, Siriraj Community Medicine Conference, Dan Chang Hospital, Suphan Buri

- 2024** Surgical management of colorectal cancer in Lynch syndrome: extended versus segmental resection. Oral and poster presentation, Siriraj Research Day

- 2019** A generalised mathematical model for estimating the perimeter of regular n-gons. Oral presentation (English), International Conference for Students in Science and Innovation; poster presentation (Thai), Development and Promotion of Science and Technology Talents Project

CLINICAL ELECTIVES

- 2026** Cardio-Vascular-Thoracic Surgery, Faculty of Medicine, Thammasat University (2 weeks)

- 2026** Hepato-Pancreato-Biliary Surgery, Faculty of Medicine, Thammasat University (2 weeks)

- 2026** General Surgery, Medical Education Center, Buddhachinaraj Phitsanulok Hospital (2 weeks)

- 2025** Hepato-Pancreato-Biliary Surgery, Faculty of Medicine Siriraj Hospital (3 weeks)

- 2025** Colorectal Surgery, Faculty of Medicine Siriraj Hospital (3 weeks)

- 2025** Cardiology, Department of Internal Medicine, Faculty of Medicine, Chiang Mai University (2 weeks)

- 2025** Internal Medicine, Medical Education Center, Buddhachinaraj Phitsanulok Hospital (2 weeks)

LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

2025–2026 **Vice President, Siriraj Surgical Society**

Project director, “Ultrasound in Surgical Emergency” workshop — developing point-of-care ultrasound competency among medical students

Co-organiser, “Essential of Burn Management & Military Medicine” workshop, in collaboration with Phramongkutklao College of Medicine

2024 **President, Siriraj Basketball Club**

Captained and managed the squad through three consecutive national championships

Directed the inter-medical-school tournament and more than five cross-institutional fixtures, establishing professional networks across faculties

Resolved a decades-old dispute over court allocation between hospital staff, alumni and students by constituting user groups, appointing a representative for each, and instituting a transparent allocation schedule — a system that remains in operation

Restructured club fundraising around an online merchandise channel, increasing profit by 200 per cent year on year

2023 **Student Committee, Faculty of Medicine Siriraj Hospital**

President of the male dormitory; third-year class committee member — student welfare advocacy and residential administration

Organising chairperson, SI 132 intramural sports — event planning and budget allocation

2023 **Lead actor, Siriraj Family Concert 2023, the faculty's signature stage production**

HONOURS AND AWARDS

2022–2024 **Three consecutive championships, National Medical Students Sports Competition (Syringe Games)**

2023 **Winner, Medical Debate Competition, Faculty of Medicine Siriraj Hospital**

2019 **Selected, POSN Physics Olympiad Camp (second camp), Naresuan University**

2018 **Selected, POSN Mathematics Olympiad Camp (second camp), Naresuan University**

COMMUNITY SERVICE

2026 **Guest speaker and mentor, Banham Jamsai Wittaya 3 School, Dan Chang — counselling rural secondary students on medical school admission and academic pathways**

2023 **Station facilitator, official medical freshman orientation programme; group leader and mentor, pre-medical outreach camp for secondary students**

2022 **Head of the Reception Department, Faculty of Medicine Siriraj Hospital — directed reception for the royally sponsored cremation ceremony for body donors, coordinating proceedings with due dignity for the bereaved families**
